

LET'S TALK SETTLEMENT...

DON'T LET THE INSURANCE COMPANY TRICK YOU INTO SETTLING FOR LESS THAN WHAT YOUR CLAIM IS WORTH!

 Insurance Companies love it when people try to settle their claim on their own. They know you don't know the value of your case! They are not going to volunteer any information to increase the value of your claim, even if you are entitled to it under the law!

 In 2018 alone, Injured Workers' Law Firm recovered over **\$9 Million** dollars in settlements for injured workers, not including money recovered for weekly checks, payment of medical bills, Medicare set-asides, or permanent partial disability.

 Workers' compensation settlements are FOREVER! If you make a mistake by settling for an amount that is less than what your claim is worth, there is no way to "undo" this damage.

 The best way to ensure that your settlement is for the maximum value of the claim is to hire an experienced attorney who can evaluate your claim and negotiate with the insurance company on your behalf.

Every day you wait to settle your claim, the value of your case declines!
